Work Experience

●

Freelance

Feb 2025 – Present

UI/UX Designer

- Designing user-friendly websites and mobile apps for global clients.
- Managing end-to-end design from research to delivery, ensuring usability and scalability.
- Collaborating directly with stakeholders to align designs with business goals.

●

Draftss

Apr 2023 – Feb 2025

UI/UX Designer

At Draftss I developed visually attractive and user-friendly designs for various customers. My work entail close interaction with the clients to understand their requirements and to come up with intuitive website and app design that surpassed their expectations.

Projects Worked On

●

Deepr Chatbot

2 Weeks, Solo Project

Problem: Low user engagement within the app.

Solution: Designed an interactive chatbot UI with personalized conversational flow.

Impact: Improved engagement and satisfaction during prototype testing.

●

GrindBean Cafe Website Design

5 Days, Team Project

Problem: Café lacked an online platform to manage catering requests.

Solution: Designed user-centric UI and integrated catering functionality.

Impact: Streamlined ordering process and enhanced user experience.

●

ActiveTherapy Website Design

2 Weeks, Solo Project

Problem: Physiotherapy clinic chain needed a professional online presence.

Solution: Designed complete website with conversion-focused landing page and clear service flow.

Impact: Built a consistent brand identity that improved trust and patient engagement.
